About me

Birthday: 11-12-1991
Nationality: Faroese

Throughout my education I have gained experience with projects, project management and working with other people and companies. My education has also given me knowledge about algorithms, data structures, and I have acquired experience with working with design patterns and software development work processes.

I am a person that gets inspired by responsibilities because responsibility motivates me to do more than what is expected of me. I love to be completely consumed by a given task - and if any issues arise, I am the kind of guy who contains the composure and will work for hours until the task is done.

If you are looking for a responsible, honest and ambitious person, I am the right choice for you. I am a good colleague with a love for great cooperative work, but who also has a strength in working independetly.

Because of the interest in web development and web technologies the Computer Science education gave me, I decided to continue with my studying and take a BA in Web Development from Københavns Erhvervsakademi which I will finish in 2019.

Language

Danish - fremragende på skriftligt og mundligt

Faroese - native

English - highly proficient in in spoken and written englsh

Programming Languages and technologies

Programming languages and technologies I have worked with or had some experience with throughout my education, internship or in my free time:

Javascript	React
Redux	Angular 2
jQuery	NodeJS
HTML	CSS
Sass	PHP
Java	C#
ASP. NET MVC	MySQL
PostgreSQL	MongoDB

Software

Software, services and operating systems that I have used and have gained experinced with as part of

Education

Public school

1998-2008	Eiðis skúli & Felagsskúlin á Oyrabakka (Faroe Islands)

Higher Commercial Examination Programme (HHX)

2010-2012	Handilsskúlin á Kambsdali (Faroe Islands)

AP Degree in Computer Science

2015-2017	Københavns Erhvervsakademi

PBA In Web Development

2017-2019 (expected)	Københavns Erhvervsakademi

Internship

Culina Plan A/S

January 2017 - March 2017

Worked as a fullstack developer on a food, nutrition and budget management web application for daycare centers where I gained experience in technologies such as React, Redux, NodeJS and PostgreSQL

my education or my free timethroughout my education, internship or in my free time:

Mac OS X	Windows 7 & 10
Linux	Unix based commands
Git	Heroku
Azure	

Hobbies and interests

> Programming and surfing the internet to gain knowledge about a technology. I love to work on projects, and at the same time read blogs about a certain technology that I want to implement

> When I am relaxing I like to read - I'm a fan of Stephen King books, The Song of Ice and Fire series and I love Tolkien's Middle-earth universe

> If I don't have any plans I can spend a whole Saturday watching Premier League football
